The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/575,189	Applicant(s) PADILLA, RONALD G.	
	Examiner DOLORES COLLINS	Art Unit 3711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Applicant's response of 10/13/09 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Furr et al. (073) in view of Ringer (560).

Furr discloses a Table Soccer or Football Game Structure.

Regarding claims 1-3, 8-9, 12 -13, 16-20, 25, 30-34 & 37-39, Furr teaches a game table adapted to be placed on a support table (see figure 1). He further teaches, in fig 5, that his table has positioning elements associated with its legs.). Furr teaches play rod assembly (see fig. 3). Furr fails to explicitly teach legs that have panels that are slideably engaged therein. Ringer discloses an Article Of Furniture. Ringer teaches legs that accommodate slideable panels and sides (see fig. 1). It would have been obvious to modify Furr to include legs that would accommodate slideable connections,

Art Unit: 3711

for a more sturdy structure. With respect to claims 4 & 21, Furr teaches a foot member with leg adjuster (27). In the case of claims 5-7 & 22-24, Furr teaches an end cap and securing element by way of his bead (35). Regarding claims 10-11, 26-27 & 35-36, Furr teaches a ball drop opening (23) (goal) and ball collector (25). In the case of claims 14-15 & 28-29, Furr fails to explicitly teach brace members or a shelf. Ringer discloses brace members (19 and 23) capable of accommodating a shelf. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Furr to include a brace and include a shelf in order to add flexibility and provide increased storage for his apparatus.

Examiner also takes official notice that conventional soccer and/or football tables are known to have end, side and bottom panels, goals, ball collectors, rods and bolts as part of their assembly. Applicant's failure to traverse this official notice is taken as an admission as prior art and herein made final.

Response to Arguments

Applicant's arguments filed 10/13/09 have been fully considered but they are not persuasive. Applicant appears to be arguing the applicability of the reference to Ringer based on the age of the reference. In response to applicant's argument based upon the age of the references, contentions that the reference patents are old are not impressive absent a showing that the art tried and failed to solve the same problem notwithstanding

Art Unit: 3711

its presumed knowledge of the references. See *In re Wright*, 569 F.2d 1124, 193 USPQ 332 (CCPA 1977).

Further, applicant's argument appears to be based on the references individually. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Examiner agrees that Game tables are not static in their design, however Applicant's arguments do not appear to comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

This action is made final.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3711

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited to show the state of art with respect to features of the claimed invention.
